life

walk-in closet

Life – perché nasce dalla forza naturale del vero legno.
Life – perché la sua logica modulare asseconda ogni spazio.
Life – perché personalizzazione significa design vivo.

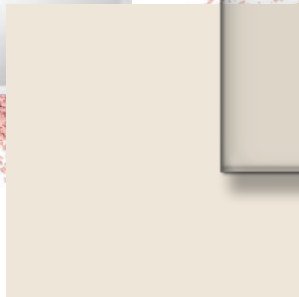

Life è l'innovativa cabina armadio firmata Arte Brotto, in cui si incontrano essenze pregiate e materiali speciali, per una versatilità compositiva fuori dal comune. Ecosostenibilità e gusto contemporaneo, leggerezza visiva e continuità tra gli spazi, con una rivoluzionaria concezione degli interni: questi i concetti che hanno guidato la progettazione di un prodotto nuovo, straordinario. Non ti resta che immaginare e vivere la tua idea di Life.

Life – because it originates from the natural strength of real wood.
Life – because its modular logic adapts to every space.
Life – because customization means live design.

Life is the innovative walk-in closet signed by Arte Brotto, where prestigious essences and special materials meet each other for a compositional versatility out of the ordinary. Environmental sustainability and contemporary taste, visual lightness and continuity between the spaces, with a revolutionary vision of the interiors: these are the concepts that have guided the designing of a new, extraordinary product. All you have to do is imagine and live your idea of Life.

natura modulare

modular nature

Una cabina armadio unica, come unica è la vita di ogni persona, di ogni famiglia. Life è costruita interamente in legno massiccio, caratteristica che la distingue da ogni altra soluzione presente sul mercato.

Un design innovativo, leggero e dalle linee semplici ed eleganti, esalta il fascino intramontabile del legno massiccio, con le venature che contraddistinguono le vere essenze di Noce e Rovere – simbolo concreto di valore, pregio, raffinatezza. Il fianco a telaio in alluminio non è considerato come un setto di divisione verticale, ma come un elemento che crea un dialogo fluido tra gli spazi: tutti i moduli possono essere comunicanti, dando vita ad una nuova concezione dello spazio interno, inteso come open space e ampiamente personalizzabile grazie alla ricca gamma di accessori di serie.

L'utilizzo combinato di fianchi in legno e a telaio, permette di accostare perfettamente vani aperti e vani chiusi, formando uno straordinario gioco di volumi pieni e vuoti – interessanti sia per estetica che per praticità. Un vero e proprio sistema modulare, che consente di creare differenti soluzioni compositive: armadi fissi, lineari multipli, ad angolo – tutti con o senza ante.

A unique walk-in closet, as unique is the life of each person, of each family. Life is entirely made of solid wood, characteristic that sets it apart from every other solution present on the market.

An innovative and light design made of simple and elegant lines, that enhances the timeless charm of solid wood, with its grain that characterizes the true essences of Walnut and Oak – real symbol of value, quality, and refinement.

The aluminium frame side is not to be considered as a partition sect, but as an element that creates a fluid dialog between the spaces: all the modules can be connected, giving life to a new conception of the inner space, intended as open space and widely customizable thanks to the large range of standard accessories.

The combined use of wooden and framed sides, allows to match perfectly open and closed compartments, creating an extraordinary game of solids and voids – remarkable for both aesthetics and practicality.

A real modular system, which allows the creation of different compositional solutions: fixed closets, multiple linear closets, angle closets – all with or without doors.

caratteristiche del sistema

system features

STRUTTURE

- Fianchi in legno: listellare di legno massiccio impiallacciato in Noce o Rovere
- Fianchi a telaio: alluminio verniciato
- Fianchi a telaio con vetro: alluminio verniciato e vetro (fumé o trasparente)
- Fianchi a telaio con legno: alluminio verniciato e pannello di legno massiccio impiallacciato in Noce o Rovere
- Schiene: multistrati di legno massiccio impiallacciato in Noce o Rovere
- Zoccolo: legno massiccio di Noce o Rovere

ANTE BATTENTI CON CERNIERE SOFT CLOSE

- Ante a telaio con vetro: alluminio verniciato e vetro (fumé o trasparente)
- Ante a telaio con legno: alluminio verniciato e listellare di legno massiccio impiallacciato in Noce o Rovere
- Ante in legno: listellare di legno massiccio impiallacciato in Noce o Rovere
- Ante in vetro: vetro (fumé o trasparente)
- Maniglie: legno massiccio o metallo

INTERNI

- Ripiani in legno: listellare di legno massiccio impiallacciato in Noce o Rovere
- Ripiani in vetro: alluminio verniciato e vetro satinato
- Cassettiere: listellare di legno massiccio impiallacciato e laccato; guide soft close
- Aste appendiabiti: legno massiccio di Noce o Rovere
- Vano porta borse: listellare di legno massiccio impiallacciato
- Maniglie cassetti: legno massiccio o metallo
- Luci: strip led 3000K con opalino

MISURE STANDARD MODULI

- Larghezza: 47 cm - 97 cm + 3 cm per ogni fianco
- Altezza: 255 cm
- Profondità: 60 cm + spessore anta

la nobiltà del legno

the nobility of wood

Arte Brotto non fa uso di essenze tropicali, ma solo ed esclusivamente di essenze pregiate ricavate da latifoglie europee e nordamericane, lavorate e trasformate nei propri stabilimenti. Scelta e controllo diretti, per una alta qualità che dura nel tempo.

Arte Brotto doesn't use tropical essences, but only and exclusively refined essences obtained from European and North American hardwood, processed and transformed in its own facilities. Choice and direct control, for high quality that lasts in time.

pannello di legno massiccio solid wood panel

È formato da componenti di legno massiccio a lista unica incollati fra di loro a formare un pannello. Il cuore del tronco, la sua parte più compatta, forte e ricca di storia e prestigio.

Made of single list solid wooden components glued together to create a panel. The heart of the log, its most compact part, strong and rich of history and prestige.

pannello listellare blockboard panel

Il pannello listellare si compone di un inserto centrale costituito da listelli di legno massiccio di abete o pioppo incollati tra loro e bloccati esternamente a venatura incrociata da fogli di legno massiccio da 2 mm. Il tutto può essere coperto da un'impiallacciatura in senso longitudinale.

The blockboard panel is made of a central insert made of solid Fir or Poplar strips glued together and fixed on the outside by with 2 mm thick solid wood sheets. The whole panel may then be veneered in longitudinal direction.

impiallacciatura veneer

Le impiallacciate sono sottili fogli di legno massiccio utilizzati per placcare i pannelli di legno listellare.

Veneers are thin solid wood sheets, used to coat blockboard wooden panels.

Thank you
