*"I see light as a never ending series of possibility to create poetic and functional products"*

*Giulia Liverani* | Head of Design

My design process starts from light and emotions more than shape and colors.

I'm driven by the belief that lighting design is not just about light up a space but rather a way of furnishing, creating astonishment, magic and beauty. Those three themes are the foundations of my way to think light and the fittings that shapes it.

---

*Il mio processo creativo inizia dalla luce e dalle emozioni più che da forme o colori.*

*Credo che progettare con la luce non significhi semplicemente illuminare uno spazio ma sia piuttosto un modo di arredare, creando stupore, magia e bellezza. Questi tre temi sono alla base del mio modo di pensare la luce e gli oggetti che le danno forma.*

## Floor and wall

# Equilibrio

The existence of the cosmic equilibrium has always been considered a fascinating phenomenon of compensation. Equilibrio Lamp is based on the same phenomenon: the balance between gravity and magnetic force.

Equilibrio is a lamp with no structure. When the two ends of the lamp are close, the magnetic force in between them becomes strong enough to challenge gravity, letting the lamp magically float in the air. The bottom part do not have a rigid body but is attracted by the upper part via two magnets. Due to the weight of the base, the two parts never get in contact creating an intense sense of astonishment.

The design is pure and simple, balanced also from an aesthetic point of view. Equilibrio is the perfect object to light up every space.

---

*L'equilibrio cosmico è sempre stato considerato un affascinante fenomeno di compensazione tra le forze del nostro Universo. La lampada Equilibrio prende ispirazione da questo principio: l'armonia tra forza gravitazionale e forza magnetica.*

*Equilibrio è una lampada priva di una struttura rigida. Quando le due estremità si trovano allineate, la forza magnetica è abbastanza forte per vincere la gravità, permettendo alla lampada di fluttuare magicamente in un permanente stato di equilibrio. La parte inferiore è attratta da quella superiore grazie a due magneti i quali, grazie al peso della base, rimangono in tensione senza mai toccarsi.*

# Floor

The Floor version of Equilibrio is a minimalistic ambient light. Placed near to a wall or a corner, creates fascinating effects of shades and reflection. It is possible to create a composition of more elements at different heights.

Thanks to its design, Equilibrio provide diffused light when the two ends of the lamp are perfectly aligned. Breaking the balance by taking the lower part, the light source can be used as a direct light.

The lamp is provided with a high power LED controlled by a touch dimmer which allows the regulation of light brightness.

---

*La versione da Terra di Equilibrio è una luce d'ambiente il cui design puro e lineare è adatto a qualsiasi contesto. Posizionata in prossimità di una parete o di un angolo, crea affascinanti giochi di luce e riflessioni. La composizione di più elementi, disposti ad altezze differenti, decora un ambiente in modo unico e suggestivo.*

*Grazie alla sua struttura non rigida, Equilibrio dona luce diffusa, quando le due parti della lampada sono perfettamente allineate, oppure luce puntuale, indirizzando il corpo inferiore dove richiesto. La sorgente luminosa è un LED ad alta potenza la cui luminosità può essere regolata grazie a un dimmer touch a pavimento.*

# ACCESSORIES

Poetic meets functionality.

The light holder accessories called “Servoluce” have been designed to be easily installed near every Equilibrio lamp. Thanks to magnetic attraction, the lower part of Equilibrio connects with the extremity of a flexible adjustable arm. Light can be direct wherever it is needed passing from a very narrow and practical reading light to an elegant way to light up a painting.

Two types of Servoluce are available, both in black finishing:

Servoluce Floor is a free standing elegant and thin accessory that can be easily add to Equilibrio Lamp, also in a second time.

Servoluce Wall is a simple and minimalistic flexible arm meant to be installed directly to the wall.

---

*La poetica incontra la funzionalità.*

*Gli accessori “Servoluce” sono stati sviluppati per essere facilmente accoppiati con qualsiasi Equilibrio. Grazie all’attrazione magnetica, la parte inferiore di Equilibrio si connette ad una estremità del braccio orientabile e la luce può essere indirizzata verso un libro, verso un quadro, verso un elemento d’arredo o dove serve.*

*Sono disponibili due tipologie di Servoluce nella sola finitura Nera:*

*Servoluce Floor è un fine ed elegante accessorio da terra, facilmente accoppiabile ad Equilibrio.*

*Servoluce Wall è un semplice e minimal braccio orientabile progettato per essere direttamente installato nella parete.*

is needed

# Wall

The wall version of Equilibrio was born with the desire to re-propose the concept on which the whole collection is based, namely the balance between gravitational and magnetic force, in a smaller and practical object. The challenge was to design a wall lamp that combines Equilibrio's magic and atmospheric light with a functional light able to enhancing and defining spaces.

The design put in the foreground this series' two characteristic cylinders which, thanks to their bond and the magnetic force, attract each other but never touch. Those are highlighted by a frame that holds in the back two more lightbulbs whose light beam tends to enhance the verticality and clean lines of the whole collection.

---

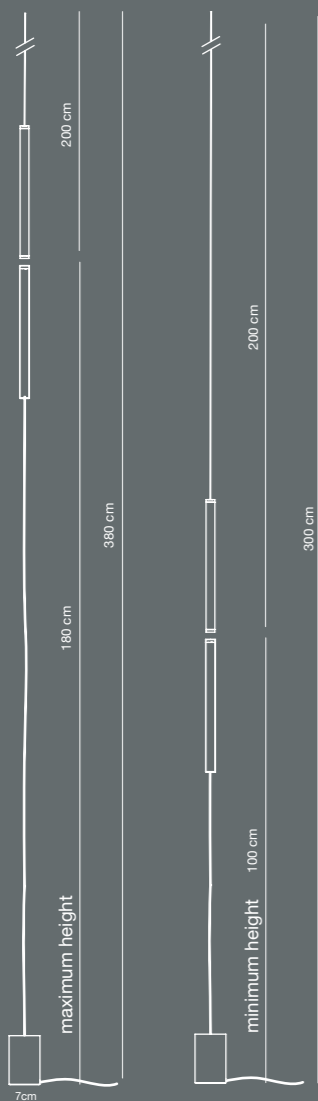

*La versione da parete di Equilibrio nasce con il desiderio di riproporre il concetto su cui si basa l'intera collezione, ovvero l'equilibrio tra forza gravitazionale e forza magnetica, in un oggetto più piccolo e più funzionale. La sfida è stata quella di disegnare una lampada da parete che coniuga la magia e la luce d'atmosfera tipica di Equilibrio con una luce funzionale capace di esaltare e definire gli spazi. Il design pone in primo piano i due cilindri caratteristici di questa serie che, fermati da due vincoli e grazie alla forza magnetica che li lega, si attraggono e non si toccano mai. Questi sono messi in risalto da una cornice che nel retro ospita due lampadine il cui fascio di luce tende ad esaltare la verticalità e la linea pulita che distinguono l'intera collezione.*

**Input Voltage:** 100÷ 240V  
**Power:** 21 W (3x7W)

**Dimmer:** no  
**Colors:** White and Brass  
**Material:** Alluminium / Steel  
**Weight:** 2kg

\* The LED can be replaced with original part  
 \*\*If your ceiling is higher, a longer steel wire for the top part is available on request

## V and O versions

# Stoccolma

“May light be flexible?”.  
Stoccolma was born as the answer to this question.

Inspired by the strings of a musical instrument, Stoccolma is a lamp that works thanks to the tension of two elastic and metal cables that support and bring current to a central light source. This is linked to the tracks through a special hooking system which allows the light to be moved and rotate, giving the user the ability to bring light wherever it is needed. The lamp is declined in two different version V and O , the first one has an external power supply to be inserted in a standard plug, the O version instead can be directly connected to the general electric plant. Different anchor points makes Stoccolma easily customizable and extremely functional: a flexible interactive lamp that can light up every place.

---

*“La luce può essere flessibile?”.  
Stoccolma nasce come risposta a questa domanda.*

*Ispirata alle corde di uno strumento musicale, Stoccolma è una lampada che funziona grazie alla tensione di due cavi elastici e metallici che sostengono e portano corrente a una sorgente luminosa centrale. Questa è collegata ai binari attraverso uno speciale sistema di aggancio che permette alla luce di essere spostata e ruotata, dando all'utente la possibilità di portare la luce dove serve. La lampada è declinata in due diverse versioni V e O, la prima ha un alimentatore esterno da inserire in una spina standard, la versione O invece può essere collegata direttamente all'impianto elettrico generale. I diversi punti di ancoraggio rendono Stoccolma facilmente personalizzabile ed estremamente funzionale: una lampada interattiva flessibile che può illuminare ogni luogo.*

olivelab.  
*daily*

daily

“My projects are the outcome of research and experimentation with innovative and unusual materials, exploring the unexplored areas of light. Unfortunately during the last month, for the first time ever, I spent more time at my home rather than in my lab. There I get the chance to work with the only components I have in my home, rediscovering the value of shapes and lines. Transforming, reshaping and changing my point of view, I used what I had to create something new.”

Daily is a collection of lamps for everyday use. Each piece is designed with pure and minimal shapes, enlightening every space with elegance and essentiality. The whole collection faces human needs and reflects OliveLab vision: a perfect balance between elegant objects and emotional lighting.

---

*“Ogni mio progetto nasce dalla ricerca e dalla sperimentazione con materiali innovativi ed insoliti, esplorando nuovi ambiti della fisica della luce. Purtroppo nell'ultimo periodo, per la prima volta, ho passato più tempo a casa che in laboratorio. Abitando maggiormente l'ambiente domestico, ho avuto modo di lavorare con ciò che avevo in casa, riscoprendo il valore di forme e geometrie. Trasformando, plasmando e cambiando prospettiva, ho utilizzato ciò che avevo per creare qualcosa di nuovo.”*

*Daily è una linea di lampade per ogni giorno nate vivendo maggiormente la casa. Ogni elemento è disegnato con forme pure e minimali, progettato per adattarsi ad ogni spazio e portare luce con essenzialità. Ponendo in primo luogo funzionalità e qualità, l'intera collezione risponde alle esigenze di luce dell'uomo, rispecchiando a pieno la visione della OliveLab: un perfetto equilibrio di oggetti eleganti e luce emozionale.*

## Pendant and wall

# D.01

D.01 represents the expression of pure and minimalist shape.

The geometric elegance of the pendant lamp, as well as the applique wall lamp, light up and enhance the environment as precious jewels.

D.01 Pendant, available in two dimensions and different configurations, is an elegant aluminium cylinder that contains a punctual high quality LED. The proximity switch on the body of the lamp allows the user to easily control the light source.

A minimal but functional spotlight that perfectly fits in a dining room, in a bedroom or anywhere requires a unique atmosphere.

D.01 Wall has a punctual high quality light source that can be moved in different directions according to user needs. The touch dimmer switch in the lower part of the lamp allows the user to easily control the light source.

A decorative and functional jewel that perfectly fits next to a bed or to enhance an exclusive corner.

---

*D.01 rappresenta l'espressione di forme pure e minimali.*

*L'eleganza geometrica della lampada pendant, così come dell'applique, illuminano e valorizzano l'ambiente come gioielli preziosi.*

*D.01 Pendant, disponibile in due dimensioni e differenti configurazioni, è composta da un elegante cilindro in alluminio contenente la sorgente luminosa LED. Per una migliore usabilità, la luce può essere accesa sfiorando il corpo cilindrico.*

*Questa luce minimale ma estremamente funzionale si adatta perfettamente in sale da pranzo, cucine, camere da letto o ovunque sia necessaria un'atmosfera unica.*

*Il corpo illuminante della D.01 Wall può essere ruotato e direzionato a seconda delle esigenze dell'utente. Il dimmer touch nella parte inferiore dell'oggetto permette di modificare l'intensità luminosa.*

*Un elemento estremamente decorativo e funzionale che si adatta perfettamente alle esigenze di una camera da letto o utilizzabile per valorizzare un angolo esclusivo.*

Pendant, wall, floor, table

# D.02

D.02 is a pure expression of the concept of “daily” lamps. The collection is designed to allow the user to customize the light position through a flexible arm or an adjustable cable. To increase the customization of the entire lamp, in order to perfectly fit different lighting needs the LED source is available with a punctual spotlight of 30° or an acrylic diffuser.

D.02 Pendant is a minimal and elegant pendant lamp composed of a multiple number of high quality LED. Available with 4 or 6 light sources, the shape of the lamp and the position of the lights is totally customizable. Perfectly fits on a dining table, in a living room such as in a hall or a bedroom. D02 Floor, as well as D02 Table, has a high quality LED at the top of a flexible arm that can be moved in different directions according to user needs. The touch dimmer on the base allows easy modification of the intensity of the light. As the Floor and Table, the D02 Wall is perfect as both reading and decorative light next to a bed or to enhance a corner.

---

*La collezione D.02 è la pura espressione del concept alla base della linea “daily”. Tutti i suoi elementi sono stati disegnati per rispondere alle esigenze luminose dell’utente grazie a braccia flessibili e cavi riposizionabili. E’ inoltre possibile personalizzare la sorgente luminosa scegliendo tra due tipologie: una luce spot con lente a 45° o un diffusore in acrilico.*

*D.02 Pendant è un lampadario leggero ed elegante composto da un numero variabile di LED. Disponibile con 4 o 6 punti luce, la forma della lampada e la posizione delle sorgenti luminose è totalmente personalizzabile adattandosi perfettamente ad ogni ambiente, dalle sale da pranzo ai salotti, dalle hall alle camere da letto. La versione da terra, così come quella da tavolo, ha una sorgente luminosa LED all’estremità di un braccio flessibile, orientabile in diverse direzioni a seconda delle esigenze. Il touch dimmer sulla base permette di modificare l’intensità luminosa a piacere. La versione da parete presenta le stesse caratteristiche di flessibilità ed adattabilità dell’intera collezione e trova perfetta utilità in una camera da letto fungendo allo stesso tempo da lampada funzionale e decorativa.*

Pendant, wall/ceiling, table

D.03

D.03 collection born from the desire to give a second life to a material already widely used in the lighting world but extremely fragile and often subject to breakage: the glass.

Experimenting with glass waste we developed a new mixture that, once placed in a mold, generates irregularly shaped discs, unrepeatable and always different from each other. The uniqueness of this lamp is also found in the fascinating interplay of light and shadow that this material is able to create when hit by a light source.

These particular light effects, combined with the purity of raw brass, make the D03 in the Wall/Ceiling and Table version, unique and precious, a decorative lamp that give personality furnishing the entire environment. The Pendant version, in total contrast to the previous ones, the glass is replaced by a disc of a pure and gentle white that annihilates the play of light and shadows in favor of a perfect and uniform diffusion of light in the space.

---

*La collezione D.03 nasce dalla volontà di dare una seconda vita a un materiale, il vetro, già largamente utilizzato nel mondo dell'illuminazione ma estremamente fragile e soggetto a rottura.*

*Sperimentando con gli scarti del vetro è nata una miscela che, una volta adagiata in uno stampo, genera dischi di forma irregolare, irripetibili e sempre diversi tra di loro. L'unicità di questa lampada si ritrova anche negli affascinanti giochi di luci e ombre che questo materiale è in grado di creare quando è colpito da una sorgente luminosa.*

*Questi particolari effetti di luce, uniti alla purezza dell'ottone grezzo, rendono la D03 nella versione Wall/Ceiling e Table, unica e preziosa, una lampada decorativa in grado dare carattere ad un ambiente. Nella versione Pendant, in totale contrasto con le precedenti, il vetro viene sostituito da un disco di un bianco puro e gentile che annienta i giochi di luce e ombre a favore di una perfetta e uniforme diffusione della luce nello spazio.*

## About Olive

OliveLab is a Startup based in 2017 in Turin, Italy. A small group of guys aiming to produce a new generation of lighting products.

Attracted by innovations, materials and new technologies, we see light as one of the most important resources of our life. The poetic but functional aspect of lighting takes us to design new projects and fittings focused on the true needs of the final consumer. Putting together our creativity, ideas and experiences we apply the same rigorous attention to context, process, material quality and detail to all our creations.

---

*OliveLab è una Startup nata a Torino con l'obiettivo di creare una nuova generazione di prodotti d'illuminazione.*

*Attratti dall'innovazione, dai materiali e dalle nuove tecnologie, vediamo la luce come una delle più importanti risorse della nostra vita. L'aspetto poetico, ma allo stesso tempo funzionale, della luce, ci porta a disegnare nuovi prodotti pensati sulle reali esigenze dell'utente finale. Unendo la nostra creatività, le nostre idee e la nostra esperienza, dedichiamo la stessa attenzione al contesto, al processo, alla qualità ed ai dettagli in tutte le nostre creazioni.*
